

User

Has a **fitness target**
Can create many **programs**
Can optionally follow 1 **program**, made by any user
Has many **daily logs**, unique to each user
Attributes:
name, height, weight, body fat %, age, gender

Fitness Target

Attributes (*all targets not current figures):
weight
body fat %
daily intake for calories, carbs, protein, and fat

Program

Has of 1 or many **workouts** (not unique to that program); 1 for each day in the program
Attributes:
program name
creator
days/week

Workout

Has specific configurations for 1 or many **exercises** (not unique to that workout)
Including the sets and reps of each exercise to do
Attributes:
Name
Focus
*the name could be the focus...
Approximate duration

Daily log

Has 1 or many workout **Sessions** (unique to that log)
Has 1 or many **meals** (not unique to a log), with specified times and servings
Attributes:
Date
Total caloric burn from sessions
Total caloric intake from meal(s)
Notes for the day

Session

Recording of 1 or many **exercises** (not unique to that session)
Including the sets, reps, and weight for each exercise done
Can optionally reference a configured **workout**
Attributes:
Session number
Start time
Duration
Cals burned
Weight moved
*fun lil aggregate of the sum of the reps X weight for each exercise in the session
Notes for the session

Exercise

Attributes:
A description of the exercise(bench press, squat, curl,...)
The targeted muscle(s) (pecs, biceps, quads,...)
A MET value (used for calculating caloric burn in daily logs)

Meal

Attributes:
Description
Serving size
Calories per serving
Macronutrients per serving (carbs, protein, fat)

User (user_id, current_program*, first name, last name, height, weight, body_fat_%, dob, gender, unit_type)

Fitness_target (user_id*, weight, body_fat_%, daily_caloric_intake, daily_carb_intake, daily_protein_intake, daily_fat_intake)
